Career Objective

Ambitious final-year Computer Science student with strong analytical thinking, problem-solving skills, and adaptability. Seeking a growth-oriented role to apply technical expertise, continuously learn, and contribute to building efficient and scalable solutions.

Technologies

Languages: Python, SQL, Java

Web Technologies: HTML, CSS, JavaScript, React.js(Basics)

Tools: Github, VS Code, Google Colab, MySQL Workbench

Concepts: Database Management System, Data Structures and Algorithms(Basics).

Education

Jawaharlal Nehru Technological University Hyderabad, University College of Engineering Jagtial | B.Tech in Computer Science and Engineering 2022 - 2026

- GPA: 8.83

Sri Venkateshwara Junior College, Vavilalapally | Intermediate 2020 - 2022

- Percentage : 98.3

Trinity Model Secondary School, Peddapally | SSC 2019 - 2020

- GPA : 10

Experience

Software Developer Intern, Eduwedo Dec 2024 - May 2025

- Built and delivered 5+ features for a Learning Management System (LMS) to improve user engagement.
- Found and fixed 20+ UI bugs to improve application stability and functionality.
- Optimized frontend responsiveness, reducing page load times by 30%.
- Managed code versions and branches using Git to collaborate with the development team.

Projects

Smart Respiratory Health Monitoring System | Python, Flask, React, MySQL, Socket.IO Jan 2026

- Developed a full-stack web application integrated with a deep learning model that detects respiratory issues with 85% accuracy
- Processed audio datasets using the Librosa library to prepare data for model analysis.
- Built a real-time consultation feature supporting multi-user communication.
- Created patient record modules to store and manage medical data.

AI-Based Adaptive Assessment System | Python, Flask, HTML, CSS, JavaScript, MySQL Apr 2025

- Designed a student segmentation system that automatically groups learners based on performance thresholds.
- Integrated Gemini and Groq AI models to automatically generate personalized question papers based on student capabilities.
- Cut manual test creation effort by 70% by automating the generation of 2 adaptive assessments per input.
- Enhanced learning outcomes by aligning question difficulty with student capability.

Internships & Certifications

- **Front-End Development Internship** : IBM SkillsBuild - Edunet (HTML, CSS, JS)
- **Cloud Computing Certification** : NPTEL
- **Summer of AI Internship** : VISWAM AI (Python,Streamlit)
